AMIR RAHIMI
Software Engineer & Systems Architect
Berlin, Germany - Remote worldwide - hello@example.com

PROFILE

Backend engineer with 10+ years building high-throughput platforms, distributed systems and developer tooling. Rust, Go, PostgreSQL, and a bias for boring technology that still works at 3am.

EXPERIENCE

2022 - Present Principal Engineer, Northwind Systems, Berlin
Led a 12-engineer platform group. Cut p99 API latency by 61% while doubling throughput. Introduced contract testing and progressive delivery.

2019 - 2022 Senior Backend Engineer, Helix Analytics, Amsterdam
Designed an event ingestion pipeline processing 40 billion events/month. Mentored six engineers; two are now staff engineers.

2016 - 2019 Backend Engineer, Vireo Labs, Remote
Built the multi-tenant billing service and its reconciliation engine.

2014 - 2016 Software Engineer, Corvid Robotics, Tehran
Real-time firmware and scheduler coordinating 200+ industrial actuators.

EDUCATION

2012 - 2014 MSc Computer Science, Sharif University of Technology
Thesis: fault-tolerant consensus for geo-distributed databases.
2008 - 2012 BSc Software Engineering, University of Tehran

SKILLS

Rust, Go, Python, TypeScript, SQL - Axum, Actix, Tokio - PostgreSQL, Redis, ClickHouse, Kafka - Docker, Kubernetes, Terraform, CI/CD, Observability

WRITING

Author of a long-running blog on Rust, distributed systems, performance and the craft of shipping software that lasts. See /blog.
